

CHRISTMAS RUBBINGS

TEACHER GUIDE

AGES: 4 - 6, 7 - 9
SCIENCE / ART: Materials,
Living Things

For this activity students will head outside and explore the natural colors around them. They will use natural objects to color the Christmas themed pictures by rubbing them onto the paper. Encourage students to experiment with different items. It can be more effective if the students crush the natural items before doing the rubbings.

This is a lovely activity for the end of term and can make a great Christmas themed display for your classroom. You could also make their rubbings into Christmas cards to send home.
