

DRAWING SCAVENGER HUNT

TEACHER GUIDE

AGES: 4 - 6
SCIENCE / LITERACY

Get your students involved with this drawing scavenger hunt where they'll head outside to see if they can find and draw all the items on the sheet. It's great if you're looking at your local area, wildlife, and observation skills. You can also use this activity to help introduce habitats.

This resource contains a few different activity sheets that allow you to differentiate based on the things they are required to find.

It's great if you can have a discussion about the scavenger hunt after they've completed it. What did they enjoy drawing the most? What did they find exciting to see? What were they surprised they saw?
