

# MY NATURE GUIDE

## TEACHER'S GUIDE

SCIENCE / LITERACY: INFORMATION TEXT  
AGES: 4 - 6, 7 - 9, 10 - 12

This is a nice non-fiction writing activity where students will explore your outdoor space while they write their very own nature guide for friends, family, or other students. They will go around your outdoor space and choose four subjects to focus on (trees, animals, habitats, etc.).

After carrying out some observations and research (using books / the internet) on each of their chosen subjects they can complete the guide templates. Get the students to either draw pictures or take photos to go with their guide.

You could laminate their guides or scan them and turn them into QR codes to be displayed in the outdoor area.
