

MY WEATHER

DIARY

TEACHER GUIDE

SCIENCE - WEATHER
Ages 4 - 6, 7 - 9, 10 - 12

Get students tracking the weather throughout the week with this fun and visual differentiated weather diary. It's a great way to get them to observe changes over time as well as learning about the weather forecasting symbols.

It's great to do this at different times of the year so that students can compare and contrast the different weather in different seasons.

This resource pack contains 2 differentiated worksheets.

Diff. 1 - Students to draw simple symbols each day to show the weather.

Diff. 2 - Students to draw the correct symbol and record the temperature and wind speed each day (if you don't have appropriate equipment you can research the temperature and wind speed).
