

SMELL HUNT

INSTRUCTIONS

Activity 2

Label your pots 1 - 4.

Go outside and find a bush or tree of your choice.

Collect 1 or 2 leaves and crush them up into small pieces by tearing them and squeezing them in your hands. Put these leaves in your pot and complete the first row in the table.

Repeat this for four different trees / bushes making sure your table matches the numbers on your pots.

Stick some card with a small hole over each of your pots.

Using Bluetac, stick a bit of card over the first column in your table.

Swap pots and sheets with your partner. Make sure you can't see the crushed leaves inside your pots.

Hunt for each of the four smells and complete the second column on your partners sheet as well as collecting one leaf for each of your guesses.

Share your guesses with your partner to see if you're correct.

Optional: Work with your partner to complete the adjectives column for each smell.
