

# TREASURE HUNT

## INSTRUCTION WRITING

TEACHER'S GUIDE  
Ages 7 - 9, 10 - 12

**For this activity students will create a treasure hunt for their partner to follow. They will hide an object (name tag, stone with their initials on, etc.) and create a set of instructions to guide their partner to their object from a designated starting point.**

### Teaching structure:

- **Share different examples of instructions with your students. Get them to spot any key features. You may want to do a lesson on imperative verbs before this session.**
- **Explain that they are going to hide an object and create a set of instructions for them to get from the designated starting point (that you can decide) to their object.**
- **Once they've written the instructions they can swap with their partner and see if they can follow them to find the hidden treasure.**

**This activity is perfect for introducing instruction writing, but can also be a great activity to link in with your measuring math topic.**
